

Personal Homepage

Navaneeth Maruthi

1. Project Description

The Personal Portfolio Website is a professional and interactive website aimed at showcasing my profile, technical skills, work experience, and projects in an accurate and engaging way. It serves as an online platform for probable employers, recruiters, and peers by expressing my knowledge of Java, HTML, CSS, JavaScript, SQL, and Python and showcasing my actual-world work experience as a Jr Software Engineer at Cognizant. The website is developed using HTML5, CSS3, Bootstrap 5, and JavaScript (ES6) to achieve modern styling and functionality, allowing easy navigation between sections such as Home, Skills, Experience, Projects, and Contact, making the website both visually appealing and user-friendly.

2. User Personas

Persona 1: Hiring Manager

Goal: Quickly evaluate candidate's skills and work experience.

Need: Clear overview of technical expertise, work history, and accessible contact info.

How site helps: Direct access to skills section, detailed experience, and quick contact page.

Persona 2: Recruiter

Goal: Skim candidate portfolio before shortlisting.

Need: Concise presentation of achievements and projects.

How site helps: Projects page provides quick links to GitHub/live demos; layout is minimal and professional.

Persona 3: Fellow Student

Goal: Learn from structure, design, or collaborate.

Need: See how personal branding and web skills are applied.

How site helps: Website structure, styling, and use of responsive design serve as inspiration.

3. User Stories

- As a hiring manager, I want to see the candidate's skills and past work experience in one page, so that I can decide if the candidate fits the job.
- As a recruiter, I want to quickly view a list of projects with links to GitHub/live demos, so that I can assess practical experience.
- As a student, I want to learn how to structure and design my own portfolio site, so that I can model my personal branding similarly.
- As a visitor, I want to use the contact page to reach out easily, so that I can network with the author.

4. Design Mockups
